

To Whom It May Concern:

I would like to recognize the outstanding accomplishments by Dave Goerke over a several week span on getting our Manila Facility up and operational. As the Vice President/General Manager for the Philippines, it was a fantastic experience working with Dave during this time as this was a critical path in order to win new business.

We were under tremendous time pressure to complete the 1500 sqm site in less than 25 days and fortunately Dave was able to complete this. The timeframes were close to impossible as the site was a shell, there was no infrastructure, technology, and we had to start from scratch. Although being in the Philippines for the first time, Dave had the ability to organize the delivery of equipment, materials, personnel, and vendors in order to meet these deadlines. This includes but not limited to; Mechanical, Electrical, Plumbing, Sanitary, Technology, Governmental and Local agencies.

We were very impressed with the quality of work in such a short time frame and it was confirmed as the fastest build on such a large scale. Today we are able to showcase the facility to our current and future clients as to the capabilities for our build out standards.

I would highly recommend Dave Goerke as your Contractor for your upcoming requirements in the US or in the Philippines.

Please contact me if there are additional topics to cover as I would be more than happy to discuss this further.

Best,

Andy Sarakinis
VP/GM Philippines
